

Quality Policy

The AGS quality policy is to achieve sustained and profitable growth by providing services which consistently satisfy the needs and expectations of its customers.

This level of quality is achieved through the adoption of a system of procedures that reflect the competence of the Company to existing customers, potential customers, and independent auditing authorities.

Achievement of this policy involves all staff, who are individually responsible for the quality of their work, resulting in a continually improving working environment for all. This policy is provided and explained to each employee by the Party Manager or QHSE Manager.

To achieve and maintain the required level of assurance the Party Manager retains responsibility for the Quality System with routine operation controlled by the Quality Manager.

The objectives of the Quality Assurance System are:

- To maintain an effective Quality Assurance System complying with International geophysical standard.
- To achieve and maintain a level of quality which enhances the Company's reputation with customers.
- To ensure compliance with relevant statutory and safety requirements.
- To endeavour, at all times, to maximise customer satisfaction with the services provided by AGS.
