

Continuous Improvement Policy

Expectations

AGS, will review the performance of our Management Systems at regular intervals to ensure their continuing suitability and effectiveness.

We will set ever better targets for continuous improvement and by on-going measurement ensure that all risks to the workforce, the environment, customer relations, the public, product quality and assets, arising from our operations, are as low as reasonably practicable.

Basic Requirements

All AGS Senior management must ensure that:

• A system for systematic review of all elements of their management systems is in place and operational. The review will comprise of:

- Management System Audit Results
- Operational Meetings
- Technical & HSE Reports
- Operational & HSE Statistics and Performance Evaluation
- The review is fully documented to show:
 - Who was involved
 - The documentation reviewed
 - The Results
 - Any corrective actions to be taken
 - The tracking and close out of those actions

• Targets are set for the continuous improvements in the HSE performance, especially in the areas of:

- Injuries and Incidents
- Spills & Releases
- Emissions, Effluents & Wastes
- Energy Efficiency
- Health & Hygiene
